The Same... Old Sarsaparilla.

That's Ayer's. The same old sarsaparilla as it was made and sold by Dr. J. C. Ayer so years ago. In the laboratory it is different. There modern appliances lend speed to skill and experience. But the sarsapa-rilla is the same old sarsaparilla that made the record-50 years of eures. Why don't we better it? Well, we're much in the condition of the Bishop and the " Doubtless," he raspberry: "Doubtless," he said, "God might have made a better berry. But doubtless, also, He never did." Why don't we better the sarsaparilla? We can't. We are using the same old plant that cured the Indians and the Spaniards. It has not been bettered. And since we make sarsaparilla com-pound out of sarsaparilla plant, we see no way of improvement. Of course, if we were making some secret chemical compound we might But we're We're making the same old carsaparilla to cure the same 44d diseases. You can tell it's the same old sarsaparilla because it works the same old cures. It's the sovereign blood purifier, and-it's Avers.

IN THE OIL FIELDS.

The Elk Fork pool in Tyler county, is by far the stellar attraction in the lower southwest. It not only leads in the amount of new work under way and starting, but is increasing its daily out amount of new work unner way and etarting, but is increasing fix daily output faster than any of the new developments. It is one of the few pools in which operations can be carried forward on an 82-cent market and bring compensatory returns to the Investors. Since the Hayseed Oil Company drilled in its original well on the Wood farm there have been about 35 wells completed, and of the entire number, only five have proven dusters. For wildow territory, it can be considered a remarkably good showing. Up to the present, the pool has been a money maker and the prospects for its future are very encouraging. The northwest and southwest show extensions that have not yet been defined. In advance of developments on either line mantioned lies unexplored territory, several miles in extent and it will be interesting to watch the result of the frontier wells on these. The Henry Oil Company is drilling an important test on the Pipes farm, and to the north and east, Broschunier & Co., are drilling an equally important well on the Rose farm.

Treat & Crawford have drilled in their

No. 4, Asher, located 350 feet southeast
of the Pricket No. 2, a dry hole, and will
have a producer good for 20 barrels a
day. It would have been no surprise
owing to fis proximity to the Pricket
inner, had it been of that character.
The A. 8, Kellar No. 1, to the northwest of the No. 4 Asher, is the best pro-Chart Fletchire win

duest in the pool. It is still hadding at 425 barrels a day. The production of the Elk Fork pool is estimated at 3,500 barrels a day.

Haps and Hishaps in the Thriving City Across the Hive.

Yesterday William Ellis, a coal miner, lost fill of hard earned money while returning from Wheeling to Martin's Ferry. While in Wheeling to bought a silver finger ring and placed the ring in his pocket book with the money and then put the pocket book in his coat pocket. He boarded an electric car and rode over with two acquaintances. When he reached home he placed his hand in his pocket to get the pocket book, expecting to show the ring to the family, and the mocket book was gone. What became of it he does not know. Ellis is employed in the coal mines of the Actina-Standard from and Steel Company, and worked hard for the money.

Heven baby understands that it is not right that it is not right that it is not right that mother should be always sickly, nervous, fretful and cross. Baby wonders what is the matter. Baby wonders what is the matter. Baby would willingly help if he could. It lies with the woman herself to help herself. No one else can do it. She can help herself if she will. If a woman will take proper care of her womanly self; if she will use the right remedy for weakness and disease of the organs that bear the burdens of maternity, she will so be healthy, vigorous and smiable. She will be able to help baby, instead of leaving baby to try and help her.

A wonderful remedy for weakness and disease of the organs that make wifelood and motherhood possible is found in Dr. Pierce's Favorite Prescription. It acts directly on these organs. It makes them strong and healthy. It has transformed thousands of suffering, pain-racked women into healthy, happy wives and mothers. It allays infammation, soothes pain, and atrong and healthy. It has transformed thousands of suffering, pain-racked women into healthy, happy wives and mothers. It allays inflammation, soothes pain, and steadies and invigorates the nerves. It prepares for wifehood and motherhood. It insures inherently healthy children. All good druggists sell fit. There is nothing "just the same" or "just as good." The druggist who tells you there is, is either mistaken or dishonest.

The poles for the electric lights have gone up on Main street like mazic. But, as stated yesterday, there was some trouble with property owners, and there was also some fun with the same. Some objected to having the poles placed in front of their homes, others wanted the location changed to nearer their homes, and so on. One of the strongest kickers is the esteemed president of the board of education. A pole was to go down in front of his property and he objected. Then some practical jokers lured him up to the city building, and engaged him in an interesting conversation for nearly an hour, and le, when he returned home, the pole, standing upright, stared him in the face. He accepted the circumstances with good grace.

The objection to the contractors for

grace.

The objection to the contractors for setting the electric light poles fortunately was soon smoothed over. A councilman and a property owner, or the latter and and a member of the company, had an occasional argument, but that was all. Said an old citizen yesterday, and very truthfully: "If it was a foreign company, everything would have been lovely, but there's a class always ready to block home enterprises."
